Relevant Projects

Ninfa's Missouri City Website

Responsive and visually appealing website for the restaurant Ninfa's Missouri City using the Next.js framework, and implemented Framer Motion animations to enhance the user experience.

Notes App

Notes website utilizing Next.js, Firebase for data storage and user authentication, and Tailwind CSS for styling, resulting in efficient note-taking and organization.

To-do List

To-do list website made using Next.js and Tailwind CSS to develop a visually impressive and user-friendly to-do list website that stores data locally. Implemented Framer Motion animations to enhance the website's interactivity and user experience.
